COPYBOX DUPLICATORS

CD, DVD AND BLU-RAY TOWER DUPLICATORS

COPYBOX 7 COMPACTFLASH DUPLICATOR

Introduction - Features - Specifications

INTRODUCTION

The CopyBox 7 CompactFlash duplicator is suitable for users who regularly need to duplicate CF memory cards. The system operates completely stand-alone, without software or PC connection. The CopyBox 7 CF can simultaneously duplicate 7 CompactFlash cards from one "master" card. Just insert the master CF memory card into the master data port, insert empty CF cards in the target data ports and press the button to start duplicating!

The CopyBox 7 CF offers a maximum duplication speed of 65 MB/s, per individual port. This allows a data throughput of 234 GB per hour, per port. However, most current CF cards offer lower writing speeds which makes the CopyBox production capacity dependant on the specific CompactFlash media used.

Operating the CopyBox 7 CF is quite simple; all functions are selected using the LCD display and control buttons on the front of the unit. This makes the CopyBox suitable for all users. In addition to the regular 'Copy' and "Compare" functions, the CopyBox CF duplicator also offers a number of special features;

- Capacity Check (checks the real flash memory capacity on a CF memory card)
- Quick Format (formats CF cards FAT16/32)
- Quick/Full Erase (erases data from CF memory cards)
- DoD Erase (erases media 3x according to the Department of Defense 5220 standard)
- Measure Speed (measures the real read and write speeds of CF cards)
- Media Check (checks if the entire CF card can be read and written)

FEATURES

- Stand-alone operation, easy to follow menu.
- Suitable for all users, no computer knowledge required.
- One master data port and 7 target data ports.
- Maximum copy speed 65 MB/s, per port.
- Compatible with all CompactFlash memory cards upto 64 GB.
