

COPYBOX 8 MULTIMEDIA

Introduction - Features - Specifications

INTRODUCTION

The CopyBox 8 "MultiMedia" duplicator is a special duplicator for creating backups of flash memory (USB Stick, SD/MMC, Compact Flash, and MS/MS Pro) to CD or DVD. Data can be copied directly from flash memory to a set of CD's or DVD's. Regular disk to disk duplication is also possible on the CopyBox 8 MultiMedia. The CopyBox "M-DISC Ready" LG writers are able to duplicate M-DISC recordable DVD's. These special archiving DVD's preserve your valuable data up to 1000 years.

The following special features are available for creating backups from flash memory to CD/DVD:

Multi-Session

Data from different flash memory sticks/cards can be copied to one CD or DVD in multiple sessions.

Disc Spanning

Data from one large flash memory stick/card can be split to several CD's or DVD's.

Multi-Disc

Data from one flash memory stick/card can be simultaneously copied to multiple CD's or DVD's.

An USB stick or memory card is placed in one of the slots in the front of the controller. Using the control buttons and LCD display the required duplication or backup function can be selected. With one press on the button the backup process is started. Due to the simple operation the CopyBox 8 MultiMedia is suitable for all users.

FEATURES

- Direct duplication from flash memory to CD or DVD.
- Built in data ports for USB stick, SD/MMC, Compact Flash and MS/MS Pro.
- Special copy and backup functions; Multi-Session, Disc Spanning and Multi-Disc.
